

HELOVAL

The streamlined, powerful and modern motoryacht HELOVAL built by CMN, designed and fitted out by Joel Bretecher, designer and architect of Stirling Design International is without no doubt one of the most prestigious yacht around. With her white satin aluminium superstructure and her navy blue steel hull finished with a gold stripe at the waterline, the elegant and harmonious HELOVAL is distinctively eye-catching, with her balanced, unbroken lines.

Her owner personally supervised every detail of her construction, and this attractive 43 m yacht, with a crew of nine, is offering high performance, striking comfort and safety in all sea and weather conditions, keeping pace with much larger yachts.

The elegance and harmony of the interior decor is reflected in the uniformity of the hot-varnished maple wood trim. The Regency-style furniture consisting in fluted chairs, wing arm-chairs and low, brass inlaid mahogany tables; the use of noble materials such as Portuguese marble for the floors, green marble from Guatemala and gold plated washbasins in the bathrooms, all create an impression of sumptuousness and refinement.

Not everyone can define perfection, but at least you can "feel it" when you step onboard HELOVAL. Since her launching in 2002, HELOVAL/PARAMOUR meets a continuous success in the charter.

Length overall	42,60m
Beam	8,60m
Draft	2,70m
Propulsion power	1218 hp/ch
Engines	2 x caterpillar 3508b
Generators	2 x 140 kva
Hull	steel
Supersrtucture	aluminium
Max speed	14 knots/nds
Cruising speed	13 knots/nds
Range at 12 knots	2800 nm/mn
Classification	bv
Naval architect	cmn
Ext/int design	joël brétécher - stirling design international
Accomodation	10 guests/5 cabins
Water toys	2
Tenders	1 special craft 5,80m
Year	2002
