

130M PRIVATE YACHT

SDI developed the conceptual design, naval architecture and exterior design of a 130-meter yacht for a private owner.

This narrow and fuel efficient hull accommodates a superstructure of exceptional purity, with a duplex Owner suite at the front, large full-beam lounges benefiting from the space offered by horizontal exhaust systems and an helipad for EC130 helicopter type aft.

The hull is made of steel and superstructure is built of pre fabricated carbon fibre elements. An in deep research work has been carried out on air conditioning system, benefiting from SDI's experience on cruise ship architecture.

For further details, please contact SDI.

Length overall	130.80 m
Beam	14.60 m
Draft	4.20 / 5.10 m
Tonnage	4 800 UMS
Passenger suites	14
Guests	60
Crew	56
Helicopter type	EC 130
